

A DTI-ALPS measurement

Four spherical ROIs (radius = 4 mm) at the lateral-ventricular level

$$\text{ALPS index} = \frac{\text{mean}(D_{\text{proj}}, D_{\text{xassoc}})}{\text{mean}(D_{\text{yproj}}, D_{\text{zassoc}})}$$

B WMH on axial T2-FLAIR MRI

Illustrative external image; analyses used total WMH burden

C Summary-statistics imaging-genetics workflow
